Golsa Joghtayie Group

Golsa Joghatai Engineering Office in Babol is a creative and established firm specializing in design, supervision, execution, and construction. They see architecture as more than building—it's a process that combines beauty, function, and identity. Their young, dynamic, and creative team uses contemporary knowledge to deliver professional and lasting results. Their goal is to make every space the best version of itself, in line with current standards.

DANESHJOO BUILDING

The façade of Daneshjoo Building

This façade showcases a contemporary interpretation of classical architecture, blending clean modern geometry with elegant arched openings and vertical elements. The light stone texture, combined with rhythmic columns and recessed balconies, creates a refined and timeless character. Subtle greenery softens the composition, adding warmth and liveliness to the building's sophisticated urban presence.
